ACODE BENCHMARKING TOOL

INTRODUCTION

The online 'Benchmarking Tool' provides institutions with an easy to use interface to house their self-assessment and consolidated data related to ACODE Benchmarks for Technology Enhanced Learning. The tool enables aggregation of benchmark activity over time for reflection, and includes:

- institutional/unit profile
- institution educational technology snapshot
- view of all institutions profile and technology snapshot
- benchmark self-assessment and team consolidation
- institution benchmark comparison
- view of benchmark Performance Indicator ratings for each institution
- anonymised report export.

The Benchmarking Tool was not completed for the start of the 2016 benchmarking activity, which means that for 2016, institutions will add their data to each benchmark 'Team consolidation' section only. During this period, feedback will be compiled and analysed to inform any further development or refinement.

Information

1. **Adding content to the textboxes throughout the tool**

Avoid issues

If copying data from programs such as Microsoft Word or web pages, avoid pasting directly into the textboxes or 'Text editor'. This action brings formatting and code that may cause issues.

Recommendation

Paste into a program such as Notepad, so all formatting is stripped. Copy the plain text, then paste into the textbox or 'Text editor'.

A 'Clear formatting' option is available in the editor, which may assist if you do paste formatted text.

2. **Saving**

Click the SAVE button, where available, regularly to ensure your work is saved. Before using keyboard shortcuts (e.g. Ctrl + S) to save, test to avoid browser or operating system inconsistencies.

A warning will display if you try to leave a screen without saving.

3. **Text editor**

A 'Text editor' will display when you click in multi-line textboxes. Details can be found in the [Text editor](#) section.
